

Jebsen & Jessen Group of Companies South East Asia

Since 1963 we have worked in partnerships with global market leaders, facilitating and capitalising on opportunities throughout South East Asia. An industrial enterprise, our business spans manufacturing, engineering and distribution activities. The core business units are: Cable Technology, Ingredients, Life Sciences, Material Handling, Offshore, Packaging and Technology.

Together we serve over 20,000 customers in the region and beyond. Through our more than 50 subsidiaries and associate companies we employ over 4,500 people.

We believe in doing good business, acting with integrity and respecting the people we serve, our own staff and the wider community. Our financial and organisational stability enables us to sustain the entrepreneurial spirit of our founders, always being prepared for new opportunities. Our state-of-the-art regional platform facilitates cost-effective access to the diverse markets in South East Asia quickly and efficiently.

Beyond the region we are closely connected to a network of sister companies in Australia, Europe and Greater China.

Executive Board

Chairman: Heinrich Jessen
Executive Vice Chairmen: Alex Chan & Per Magnusson

What We Do

We speak the language of South East Asia, creating a bridge between our technology partners and the varied markets of this diverse, economically vibrant region. On the ground we have local expertise and local facilities. At a regional level we provide a professional, well-resourced network of business and corporate services to our member companies.

We specialise in cost-effective market penetration for high-quality products that require meaningful technical and customer support services. Our commitment to the region spans 50 years. Prudent planning and a long-term vision keep us focused on a sustainable future over the next 50 years and beyond.

With an intimate knowledge of the local markets, the Group has been a major catalyst in introducing state-of-the-art technology from world-class partners to the region.

Group Structure

Each of our Regional Business Units operates autonomously, with our Executive Board providing a strategic framework. The Group is supported by our country-based Business Services Units, which enable us to execute work effectively, and our Central Services Unit, which ensures compliance, risk management and prudence across the region.

Corporate Compliance

As a corporate citizen, we take social responsibility seriously. Reflecting a value system instituted from the founding fathers, our corporate commitment and operating philosophy govern the day-to-day operations of the respective business activities.

We adhere to the global norms of our technology partners and maintain sound and ethical business behaviour in all endeavours. Stringent policies are applicable throughout our Group to be compliant with international corporate governance guidelines and to ensure sustainable and fair business practices.

Corporate Social Responsibility

Looking beyond our own business we see a social responsibility, heightened by the reality of life in less developed parts of the region. As a responsible corporate citizen, we believe in making a difference to the environment and community we operate in. This is reflected in our steadfast commitment via contribution of resources and innovative technologies for the sustainable development of the environment and engagement of the community.

Our vision of corporate responsibility is that it stands as a constant part of what any organisation should do. Our Business Principles document the expectations we have of our corporate behaviour. Environment, health and safety policies and procedures provide a structure for action throughout our businesses. Reflecting our commitment to the environment, we became one of the first carbon neutral industrial companies in South East Asia. Every year we measure our carbon footprint and offset the carbon we use. Through our Meet a Need programme, our employees engage voluntarily in hands-on Corporate Social Responsibility projects, helping us live up to our Corporate Philosophy and fulfilling our commitment to our community and the environment.
